CLEANBOX
FILTRATION CARTRIDGES

**Fiber, Fine Foam, Cleanwater, Aquaclay and Activated Carbon**
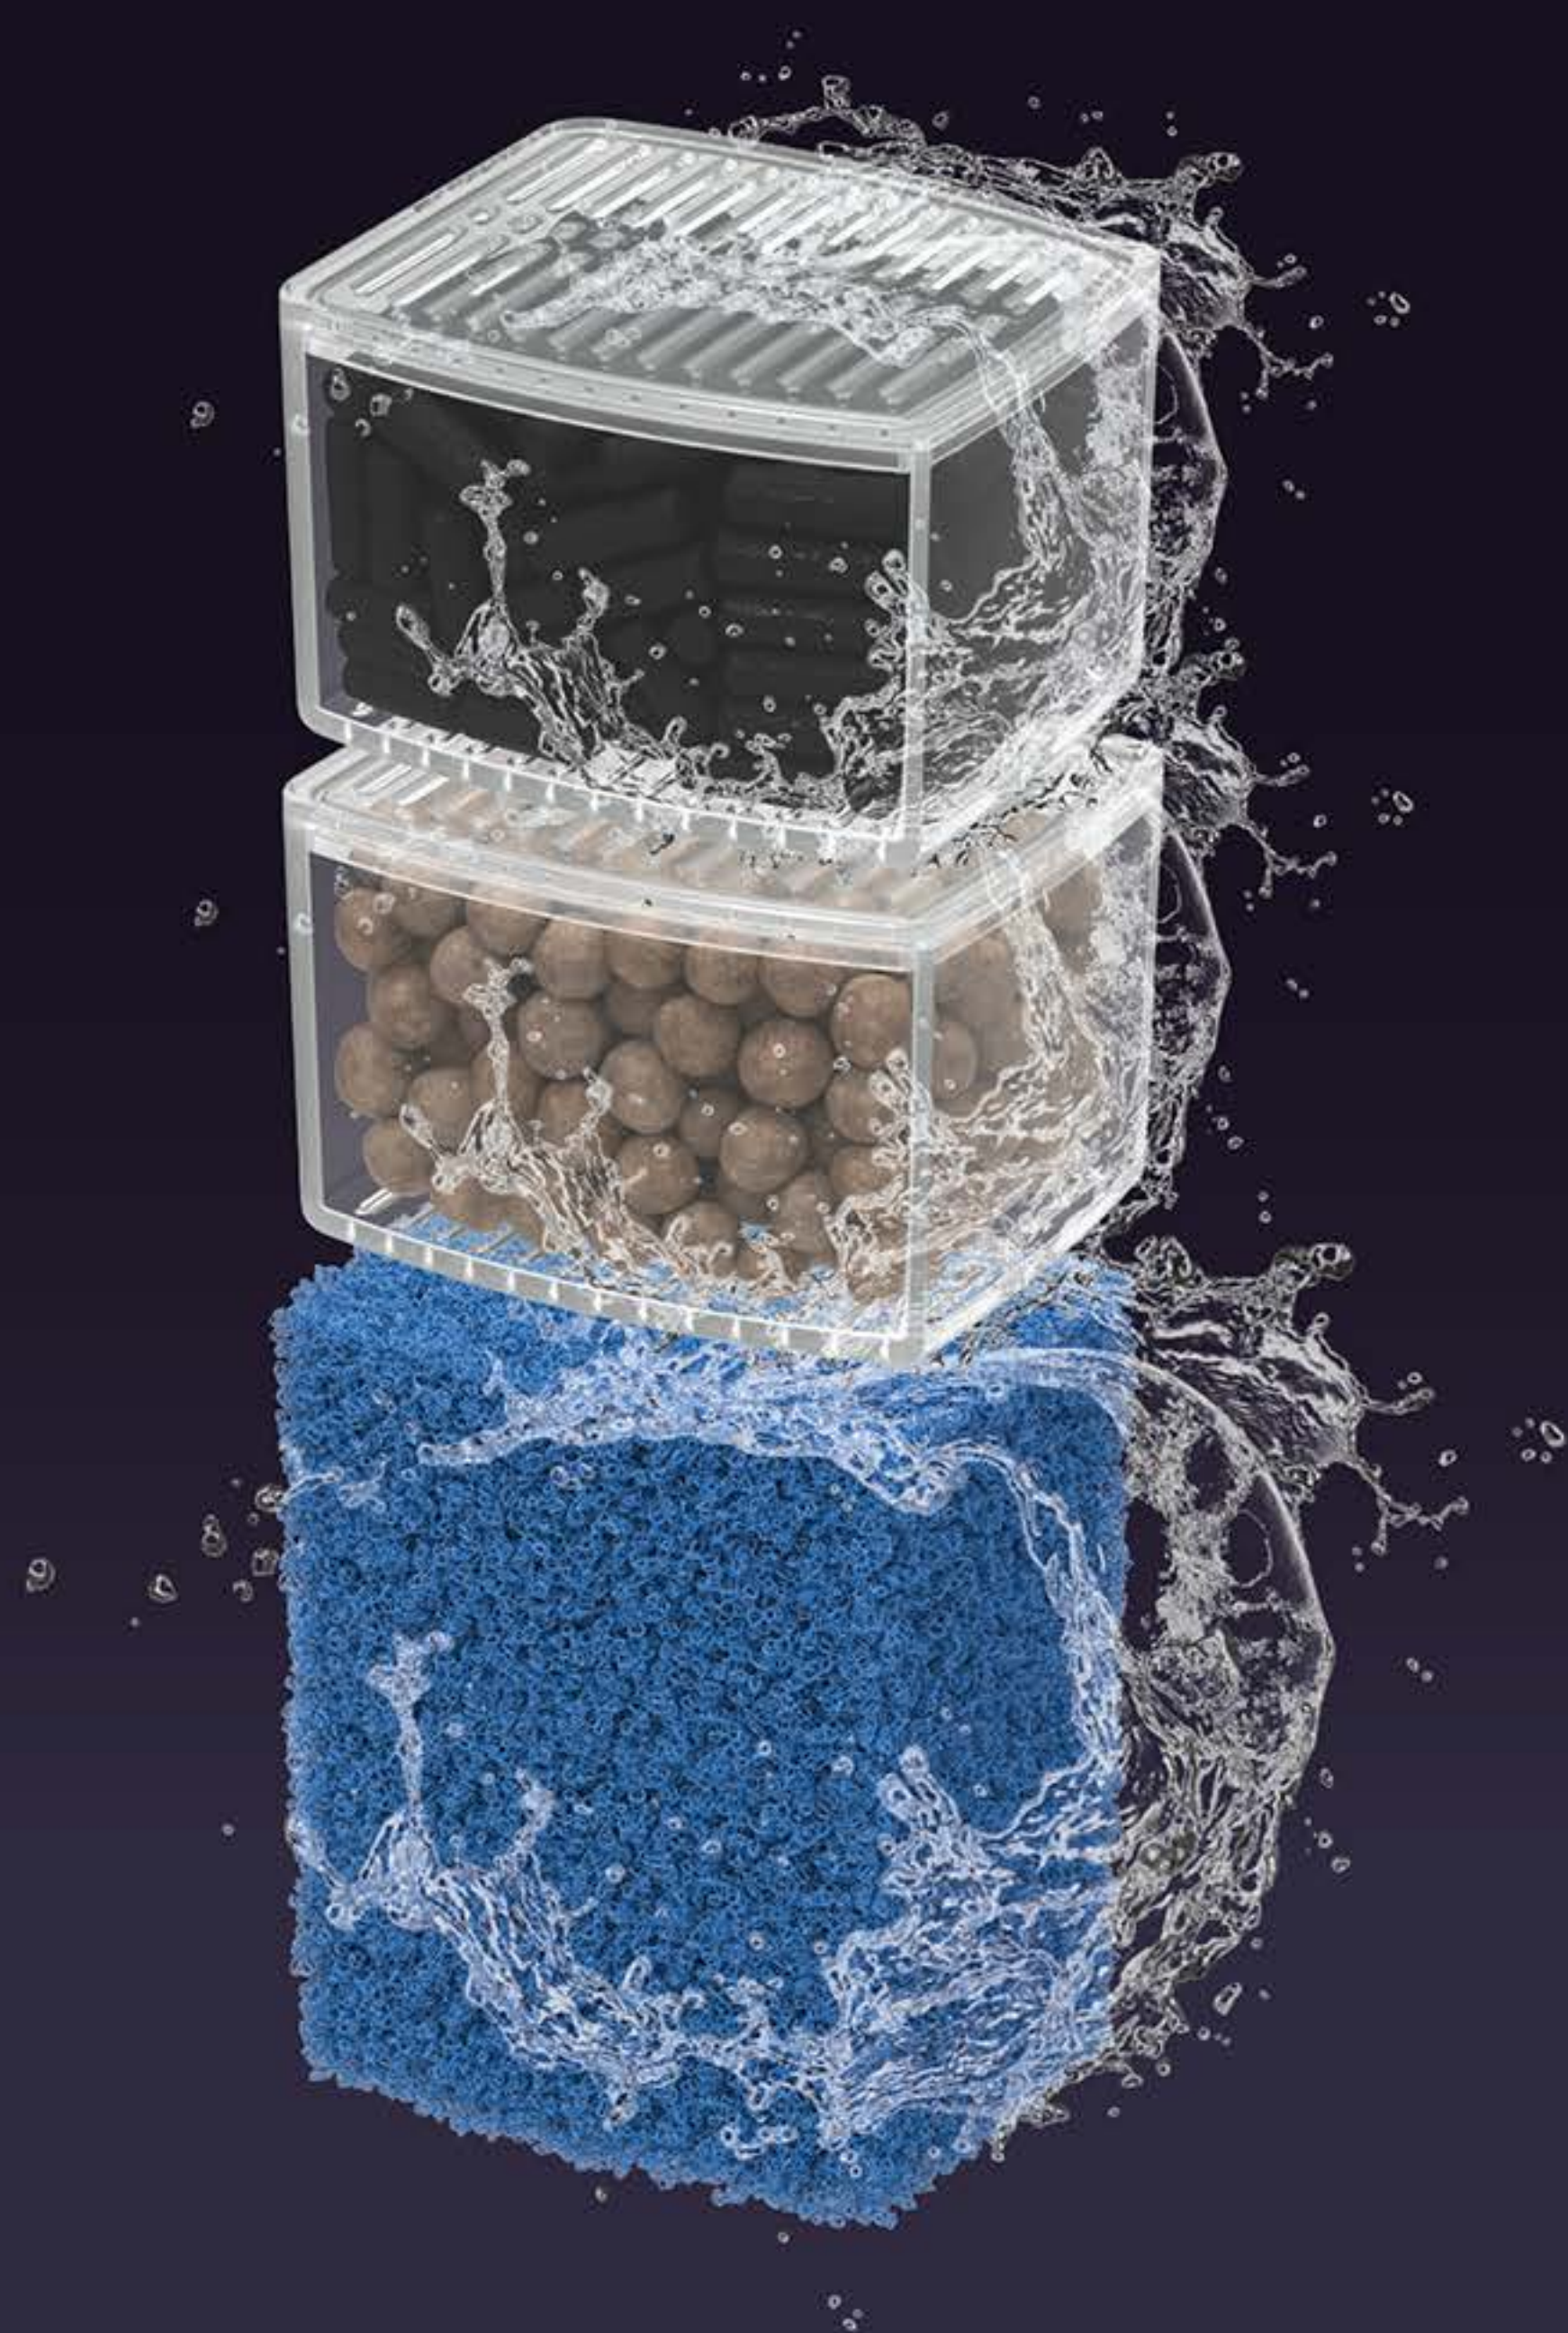

FILTRATION

CHEMICAL
ELIMINATES DISSOLVED ORGANIC ELEMENTS

BIOLOGICAL
PROVIDES A HIGH COLONIZATION OF BENEFICIAL BACTERIAL

# MECHANICAL
RETAINS THE LARGEST PARTICLES IN THE WATER

CLEANBOX FINE FOAM

Foam structured to capture the largest impurities in the water.

XS 14059, **S** 14060, **M** 14061

Rinse recommended **once a week**

Recommended replacement **every 3-5 months**

CLEANBOX FIBER

Fiber to retain the finest particles suspended in water.

S 14062, **M** 14063

Recommended replacement
every month

CLEANBOX AQUACLAY

Porous beads for the colonization and development of bacteria essential for the proper maintenance of the aquarium.

S 14066, **M** 14067

Recommended replacement
every 6 months

CLEANBOX ACTIVATED CARBON

Absorption of odors, organic waste and chemical residues.

S 14064, **M** 14065

Recommended replacement
every month

CLEANBOX CLEANWATER

Cleanwater facilitates the maintenance of your aquarium. It reduces the concentration of undesirable substances in the water which enhances the unwanted algae growth. It absorbs the phosphate, the nitrite and the nitrate without removing important trace elements.

S 14068, **M** 14069

Recommended replacement
every month
